

Some restricted deliverables are only available when you are logged in.

{jd_file file==D4.1 Database of useful data for SWAT modelling and report on data availability and quality for hydrological modelling and water quality modeling in the Black Sea Catchments}

{jd_file file==D4.3: Calibrated high-resolution water quality models for BSC - the Vit catchment}

{jd_file file==D4.4 Outputs from hydrological scenarios running over the grid}

{jd_file file==D4.5 A package of calibration procedures linked to SWAT through a generic platform to perform calibration, validation, and uncertainty analysis}

{jd_file file==D4.9 Bringing hydrological and meteorological data as inputs for SWAT (with new partners from Russia and Turkey)}

{jd_file file==D4.11 Calibrated water quantity and quality model for BSC, with impacts of scenarios. The hydrological model of the Black Sea}
